

10 mg MONOCLONAL ANTIBODY

TAKE ADVANTAGE OF OUR WELL ESTABLISHED
“WELCOME OFFER” FOR EVERY NEW HYBRIDOMA

This includes:

- Mycoplasma testing
- Adaption to serum-free chemically-defined medium
- Cultivation in suspension in 1 liter scale
- One-step purification by protein A/G
- Quality control (CGE)
- Certificate of analysis
- 10 mg guaranteed
- Timeframe 6-8 weeks

Additional options:

€ 1222 for endotoxin-free antibody (≤ 10 EU/mg)

FOR € 999

LARGE-SCALE PRODUCTION OF MICE HYBRIDOMA BASED MONOCLONAL ANTIBODIES

Prerequisite: "Welcome Offer"

- Serum-free cultivation in spinner systems or stirred tank fermenter
- Separation of cells
- Filtration and concentration of cell culture supernatant by cross flow filtration (TFF)
- One-step purification by protein A/G chromatography
- Dialysis or desalting against PBS, pH 7.4 (or other buffers)
- Sterile filtration
- Protein concentration (UV 280 nm)
- Capillary gel electrophoresis (CGE)

Ordered quantity	Price per mg [€]
10 mg	50.00
50 mg	40.00
100 mg	30.00
500 mg	22.00
1 g	16.00

Please use this pricelist as an indication.
Depending on the productivity of the cell line the price can vary up to 20 %.

Additional services:

- GMP-compliant documentation
- Endotoxin-free material for preclinical use
- Analytical SEC*
- Labeling
- Lyophilisation
- Aliquotation

*included for orders larger than 100 mg
