

PRODUCT INFORMATION

Anti-Spike (S1) recombinant, chimeric IgA antibody_RP_SZ_860

Description:

InVivo offers a series of different recombinant, chimeric antibodies, containing mouse variable domains (V_L+V_H) with human IgA1 (C_H) and kappa (C_L) constant domains.

The variable sequences of RP_SZ_860 are identical to sequences of hybridoma cell line IgG antibodies AK3422 and AK3424 (also available from InVivo), which were generated by mouse immunization with recombinant full-length SARS-CoV-2 Spike protein (S).

The recombinant antibodies are produced under serum-free conditions in HEK-INV cells (InVivo proprietary optimized; human embryonic kidney, HEK293 cells) and purified through one-step purification with Protein-A affinity chromatography.

| | |
|-----------------------|---|
| Product-ID: | RP_SZ_860 |
| Host: | Mammalian, HEK |
| Isotype: | Chimeric antibody with mouse variable (Fv) domain and human IgA constant domains. |
| Subclass: | hIgA1 κ |
| Formulation: | Liquid, PBS, pH 7.4, 0.2 μ m sterile filtered |
| Concentration: | \geq 0.5 mg/ mL |
| Purity: | \geq 90% (via analytical CGE under reducing conditions) |
| Conjugate: | Unconjugated |

The product is for research use or for further manufacturing only.
