

INVIVO

BioTech Services GmbH
a BRUKER company

Recombinant Antibody Production

APPLICATIONS:

- research use only
- Preclinical use
- Human *in vitro* diagnostics

INFORMATION:

- InVivo BioTech Services GmbH is certified according to
 - ISO 9001:2015
 - ISO 13485:2016

InVivo BioTech Services GmbH is a leading European biomanufacturer with ISO 9001 and ISO 13485 certification. We have been a Bruker company since 2017.

For more than 25 years, InVivo has been committed to supporting academics and industries with our competence, expertise, and reliable products.

We are there with you to make you feel confident and to bring more efficiency when converting your ideas into practice.

Every new project starts with cDNA design and synthesis, this is how we ensure efficient expression rates and optimal product yields. After an initial small-scale pilot production to assess the feasibility of the project and to refine production parameters, upscaling in production is possible and we can easily meet your demand for protein quantities of up to 2 g per batch.

NEW Quantities available

1995 € / 5 mg

3499 € / 20 mg

5500 € / 40 mg

INVIVO'S EXPRESSION SYSTEM FOR TRANSIENT TRANSFECTION

QUALITY GUARANTEED:

- Highest purity, aggregate-free
- Endotoxin-free
- Batch-to-batch consistency

TURNAROUND TIME:

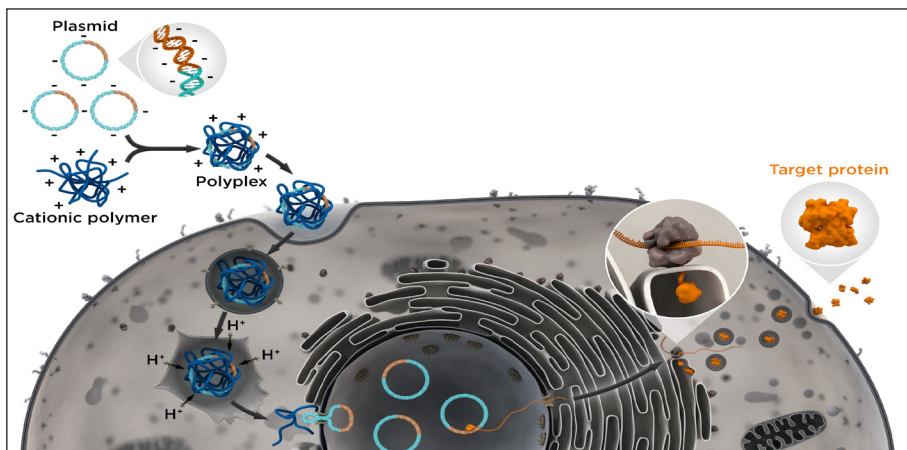

- 8 - 12 weeks

DELIVERABLES:

- purified antibody
- Certificate of Analysis

EXTRAS:

- Lyophilization
- Tag-removal vial protease cleavage
- Antibody subclass switching
- Lyophilization
- Protein labelling
- Aliquoting

Transient gene expression (TGE) is a commonly used method for the production of recombinant antibodies and proteins in mammalian cells within a short time.

However, effective results can only be achieved, if all components of the TGE system are carefully matched and harmonized.

Following years of research and development, InVivo established an optimized system for the production of mammalianderived proteins via transient gene expression in HEK cells.
